Convert the images so Image J/Fiji reads the images properly

1. Go to: File>Save/Export to Tiff
2. In window that opens:
   a. Use "Folder selection" to navigate to where your images are
   b. In the "all images" box on the left highlight the stitched images you want to export (all should end in "_001.nd2")
   c. Use the "Feed" button to move them to the right box.
      a. The box on the right side is images that will be batch processed
   d. Under "Output Folder" Check the box that says "Same as input"
   e. In the bottom part of the window select the "OME-TIFF" option
   f. Click "Export" to process images!
